Engineering Solutions and Project Execution

Founded in 2008, Morris Engineering, LLC brings together years of experience and expertise from within the fields of forensic engineering and the construction industry. With a focus on satisfying individual client needs, our company offers full-service engineering to evaluate, diagnose and solve existing problems and construction related requirements.

Our growing team of engineers, project managers, technical staff and highly qualified consultants perform alongside Principal, Steve Morris, who is directly involved in each project. The combined expertise of our team ensures your project gets the attention, skill and enthusiasm it deserves.

Ranging from single-family homes to condominium associations, we have the know-how our clients expect from a first-rate engineering company. Our portfolio encompasses leak investigation, environmental issues, structural and mechanical analysis, transition, reserve and deferred maintenance studies, and project management.

Forensic Investigations, Expert Witness and Litigation Services

Morris Engineering has extensive experience in the area of forensic investigations, as well as expert witness and litigation services. Steven Morris is a Senior Member and Diplomat Engineer of the National Academy of Forensic Engineers. Our courtroom experience has resulted in positive settlements and significant jury awards for our clients.
