About Allied Fire & Safety

Family owned and operated since 1970, Allied Fire and Safety remains a leader in the Fire and Life Safety Industry. We have paved the way in the industry by offering complete inspection, installation, repair, design and engineering services. In recent years, we expanded our pipe fabrication division to help service our clients in a more efficient manner. In addition, we also encourage local contractors to utilize our fabrication services at competitive prices.

At Allied our motto is simple “One Call Does It All”. Allied is one of the few fire safety companies that can truly provide a total solution for all your Fire and Life Safety needs. We have you covered whether it’s design, installation, repair and/or service of extinguishers, sprinklers, alarm systems, exit/ emergency lights, central station monitoring, kitchen suppression systems or special hazard systems.

By utilizing Allied’s services you can create the following unique advantages for your company:

- Monetary savings on combined service agreements to meet your Fire Safety budgets. We share efficiencies of combined service agreements with you and the overall cost savings. Stop being charged for a service call every time a different vendor services your systems. Let us do all of your systems and eliminate those unwanted service calls.
- A single vendor program can eliminate the coordination of several vendors servicing systems that are essentially interrelated. Finger pointing and second guessing is completely eliminated! You need only to call one number for service (732) 922-3399.
- Our highly trained professional staff performs in accordance with all required Fire and Life Safety Code Enforcements. All inspection reports meet NFPA, State and Local Codes as well as Insurance Company requirements.

Remember, one call truly does it all! Our commitment to excellence and our customers is our number one priority. So give us a call today at (732) 922-3399, and let us create a unique advantage for your company.
Design, sales, installation and semi-annual inspections in accordance with New Jersey Uniform Fire Code, NFPA-17, 17A & 96, State & Local Codes and Standard Insurance Requirements. New codes as well as your insurance carrier may require you to replace your dry chemical suppression system with a new U.L. 300 wet chemical suppression system. Don’t invest thousands in a new system without knowing all the facts. Let our highly trained technicians perform an extensive evaluation of your current kitchen suppression system.

New codes as well as your insurance carrier may require you to replace your dry chemical suppression system with a new U.L. 300 wet chemical suppression system. Don’t invest thousands in a new system without knowing all the facts. Let our highly trained technicians perform an extensive evaluation of your current kitchen suppression system.

Design, sales, installation and quarterly/annual inspections in accordance with NFPA 13, 13D, 13R and 25, State & Local Codes and Standard Insurance Requirements. We are there for you whether you’re a large retail chain, government office, school or small storefront. At Allied, we not only design your sprinkler system; we custom fabricate your order, deliver it on our own truck, and provide professional installation. When your installation is complete, please remember to speak to an Allied representative about our inspection services. By doing so, you can be assured that your place of business will remain a safe and violation free environment.

Sales, installation, and monthly/quarterly/semi-annual/annual inspection ins in accordance with NFPA 96, State and Local Codes and standard Insurance requirements.

We provide a full line of approved UL Listed Communications Equipment and UL Central Station Monitoring services that meet all requirements of the new stricter Codes being enforced. You may require only a minor reprogramming change or a new Communicator on a one-time installation basis, but the added protection and potential savings in insurance costs may present you with a positive choice.

Design, sales, installation, and semi-annual inspection in accordance with NFPA-2001, NFPA-12A/B, State & Local Codes and Standard Insurance Requirements. You’ve worked hard to make your company successful, don’t chance losing your most valuable equipment and documents to a fire.

Our on-site engineering team is level 4 Nicet certified, and simply put, the best in the business. No job is too big or too small for our team. From air traffic control towers to small limited area systems; we have you covered every step of the way.
