## DOCUTREND IS DEFINED BY YOUR SUCCESS

---

Docutrend is a total document and office technology solutions provider that helps clients increase workflow efficiency, heighten overall business productivity and maximize their resources. Our team of experts will assess your business needs and goals; building a unique solution designed to meet your requirements for today with the ability to easily scale as your business grows in the future.

We offer the most advanced solutions from the top industry brands, giving you peace of mind that the solution in place will be the right fit for your organization. Effectively allowing our clients to focus on what matters most, which is growing their business.

We have all your business technology needs covered: communication, copier/print, document workflow, managed IT, and more.

Docutrend is more than just another vendor, we are your business partner.

---

## OPTIMIZE YOUR BUSINESS WORKFLOW

---

Workflow technology stacks are unique within every industry. Tailoring the right-sized IT, cloud, voice, document, and collaboration solutions is what Docutrend does best.

Whether your business has regulatory requirements for security, wants to increase the efficiency of its print and document workflow, upgrade business communications; or simply needs to distribute documents electronically, Docutrend's suite of solutions can help your business achieve its goals.

---

## BOTTOM-LINE IMPACT

---

The way a team communicates and works together is the key to the success of a business. That's why Docutrend focuses on making sure your employees can stay connected to clients as well as each other driving productivity which has a tangible impact on the bottom line.

---

## MAXIMIZED RESOURCES

---

Whether print, document workflow or IT, we work to develop and manage all aspects of a business; driving efficiencies, recouping investments, and increasing the speed at which customers are supported by leveraging current and future resources.

---

## INCREASED EFFICIENCY

---

With the implementation of a customized document workflow solution, productivity increases and resources are maximized. We work with organizations to integrate multiple solutions to create, capture, communicate and collaborate in real-time.

Docutrend develops innovative, cost-effective solutions and services which solve the many problems or challenges posed by decreasing budgets, increased need for collaboration, and singular accountability.

Our solutions integrate the best-in-class office equipment with leading workflow solutions to automate and streamline document processes, simplify information management, promote collaboration, and ensure the strictest security and compliance.

Today's employees want flexibility both, in where and when they work. With access to the latest devices and technology — and they expect their employer to make it easy for them.

## Printer & Copier Systems

Digital solutions and modern printing technologies help organizations communicate, connect, and get work done by maximizing company resources by implementing the right equipment based on business need and goal.

## Capture & Distribution

Streamline workflows by digitizing data, securing access, and fostering collaboration. Our solutions are can be designed for specific industries, workflows, and more and can easily be scaled to fit within each customer environment

## Document Management

Easily track, manage, and store important documents for real-time collaboration, while drastically reducing the use of paper and increasing productivity, plus maintain a high-level of user and document security.

## eSignature

Quickly configure & deploy legally binding e-signatures for documents, contracts, and web forms with automated collaboration, thereby increasing the speed of business and effectively increasing productivity.

## Unified Communications

A single communication system seamlessly integrates all communication tools – desktop phones, mobile phones, and computers – into one manageable solution oriented around your employee's needs and work style.

## Managed Services

Print, IT and device managed services ensure a workflow strategy is developed which helps avoid unexpected expenditures. Get the most out of your office technology by managing accessibility, security, costs, and networks.
