Bergen Protective Systems, Inc.

Est. 1964

ABOUT US

Established in 1964, Bergen Protective Systems, Inc. is one of the oldest and most well-respected names in the electronic life safety and security industry in the State of New Jersey.

Since our inception, the fundamental principles of the company have never wavered or been compromised. Those principles are to ensure the safety and security of all clients and their possessions by making sure that all installations are completed in accordance with applicable codes and requirements. As a measure of our commitment to quality and excellence, Bergen Protective Systems, Inc. is a U.L.® Listed company, as well as a member of the NFPA (National Fire Protection Association), the NJESA (New Jersey Electronic Security Association) and the AFAA (Automatic Fire Alarm Association). Our Founder and President, Joseph F. Cioffi, Jr. was one of the founders of the New Jersey Alarm Association (now the New Jersey Electronic Security Association) and served as the organization's first president. His son, Joseph F. Cioffi, III, has since served as president of the NJESA.

Today, Bergen Protective Systems, Inc. is headquartered in Englewood Cliffs, New Jersey, having expanded to a new facility to meet the needs of clients. With a professional and highly competent staff, we are committed to addressing our clients' needs 24 hours a day, seven days a week.

FIRE ALARM & LIFE SAFETY

A properly designed and installed fire alarm system is a vital part of any building. With over 50 years of experience in the design and installation of fire alarm systems, Bergen Protective Systems is well-suited to address any of your fire detection challenges, with cost-effective and reliable options.

1 The first step in a reliable fire alarm system installation always begins with the right design.

2 Our skilled technicians will install your system in a clean and professional manner.

3 We can continue to provide you with service and perform inspections for the life of your fire alarm system.

5 Year False Alarm Guarantee

For Fire Alarm Systems that we Install, Service and Inspect.

Industry Leading
PRODUCTS

Being a Gamewell-FCI by Honeywell partner allows us to offer cutting-edge technology that is highly scalable to meet your growing needs.

- We offer UL Listed central station monitoring. We can utilize a variety of communication methods, including cellular and IP technologies.

- As threats extend beyond the risk of fire, we offer voice evacuation systems, as well as ECS (Emergency Communication Systems) and MNS (Mass Notification Systems).

- As states continue to adopt laws requiring CO (Carbon Monoxide) detection, we can help you be ahead of the curve with detection for CO and other hazardous gases.

BURGLAR ALARM / INTRUSION DETECTION

Keeping your business secure is essential for continuity. Utilizing an open platform, we are able to monitor much more than theft. Temperature sensors can monitor whether your IT room is getting too hot, or flood sensors can help you rest assured that your stock room is not flooded. Integration with other building systems allows for greater flexibility and control. With multi-partitioned systems, we can protect multiple office suites or stores with one control panel, saving time, labor and expense. From motion detection to asset protection, with a variety of sensors available to meet any need, we can find the solution that fits your business and your budget.

24/7 SUPPORT

Our telephones are always answered by live people, and our technicians are on call 24 hours a day, 7 days a week.

UL CERTIFICATED Installations

We are proud to be one of the few companies in the industry to offer UL Certificated systems. Often required for higher-risk locations, these systems are designed and installed to meet the most stringent standards.

- IP / Cellular Monitoring
- UL Listed Central Station Monitoring
- Opening / Closing Logging with Reports
- Hold-Up and Panic Alarms
- Temperature / Flood / Environmental Monitoring

- iPhone / Android Control
- Outdoor Motion / Perimeter Detection
- Asset Protection
- HVAC / Lighting Integration
- Safe / Vault Protection

CCTV / IP SURVEILLANCE

Although the expression 'a picture is worth a thousand words' is often true, the same picture can be worth even more when it comes to actionable information. Gone are the days of analog cameras and grainy images. Today's surveillance systems are often completely digital networked systems. Employing high-definition megapixel cameras that capture incredible detail, our advanced surveillance systems allow you to see more than ever before.

Remote Viewing

Whether from your computer at home, or from your iPad on the beach, you can always keep track of what's going on in your facility.

Analytics

From people-counting to trespass monitoring, active analytics can take a passive video stream and make it an active part of your security plan.

Monitoring

Central station monitoring can save you thousands of dollars in annual costs for security guards.

ACCESS CONTROL

Sometimes, securing your facility from outside threats is the easy part. Too often, the greatest threat is from within. Physical keys can be lost or easily copied; while codes can be effective, they can be shared or remain unchanged for too long. We offer solutions that incorporate proximity, smartcard or biometric technologies to ensure that you can control who, when and where people have access.

- Multi-site Control / Administration
- Graphical Interfaces
- Audit Tracking and Logging
- Biometrics (Fingerprint / Palm / Iris)
- Custom ID Badging / Secure Credentials

- Intercom Integration
- Temporary Access / Visitor Tracking
- Garage / Gate Access
- CCTV / Surveillance Integration
- Elevator Control
