

MORRIS ENGINEERING, LLC

Founded in 2008, principal Steven J. Morris, PE, RS, NAFE, has assembled an expert team of Engineers and Construction Technicians with extensive experience in building and site remediation. We are big enough to handle all of your projects, while small enough to provide personalized solutions.

We are committed to providing our clients with superior service.

Community Associations

We collaborate with Association Boards and their Property Managers to help ensure the smooth operation of any project.

We provide peace of mind by helping to confirm the work performed is appropriate and enduring.

We continuously monitor emerging property enhancements and requirements to help you prepare for the future.

Attorney & Legal Firms

Licensed in New York, New Jersey, and Pennsylvania, our forensic engineers have acquired years of practical experience that can make a critical difference in court.

Our team of expert witnesses is prepared to develop litigation reports and testify on your client's behalf.

We can support you from identifying a defect through final settlement or verdict. Let us help you make your case.

Commercial & Industrial

We provide professional guidance to commercial property owners and investors when acquiring a building or fitting out a building for a new lessee.

Our team of qualified engineers can assess a building's condition and report needed repairs and renovations.

We can facilitate keeping your project on scope and under budget.
